

Floor Surface Mount Track Installation Instructions

INSTALLATION INSTRUCTION STEPS

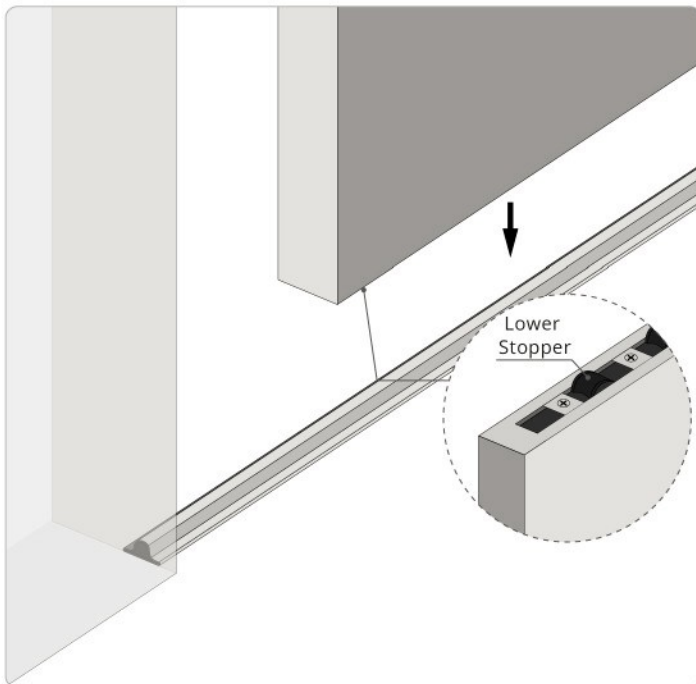

Step 1

After the upper rail is installed, check vertical alignment with a measurement tool, mark on the ground.

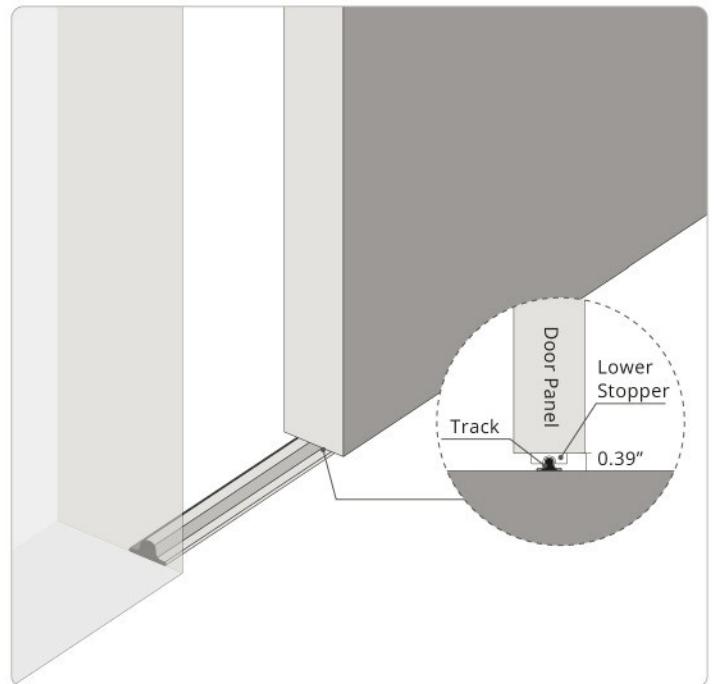

Step 2

Peel off the adhesive tape that comes with the bottom of the track and stick the track to the floor along the horizontal line.

Step 3

Tighten the positioner at the bottom of the door panel, adjust the position, and the positioner into the ground rail.

Step 4

Installation is completed.
