Color Disclaimer:

Due to differences in monitor and browser settings, digital photography, and batch variations, the images you see on the screen may differ from the actual product. If color is important, we recommend ordering a sample before placing your order.

Wood Character:

The color and grain of wood vary directly with the age of the tree and the conditions in which it grew in the forest. The color of wood will change over time when exposed to both natural and artificial light. Even if the wood surface is coated with a stain, the natural beauty of the wood will evolve. Additionally, the same color can appear differently on various types of wood.
